

**Connor Schuler**  
**SEC-260-02**  
**STR2026**

Deliverable 1 - Successful curl:

***Image shows 1 command and 1 line of output, with the text “Powered by Rock Linux” highlighted in red. This indicates both a successful request and response from the Apache web server, and the text “Powered by Rock Linux” was in the response.***

```
[connor@schulerUM ~]$ curl -s http://10.0.17.7 | grep -i "powered by rocky linux"
  <a href="https://rockylinux.org/" id="rocky-poweredby"></a> <!-- Rocky -->
[connor@schulerUM ~]$
```

Deliverable 2 - Successful lynx view of Apache test page:

***Image shows 1 screen of output, with the text “HTTP Server Test Page” at the top. This indicates both a successful request and response from the Apache web server.***

HTTP Server Test Page powered by: Rocky Linux

HTTP Server Test Page

This page is used to test the proper operation of an HTTP server after it has been installed on a Rocky Linux system. If you can read this page, it means that the software is working correctly.

Just visiting?

This website you are visiting is either experiencing problems or could be going through maintenance.

If you would like let the administrators of this website know that you've seen this page instead of the page you've expected, you should send them an email. In general, mail sent to the name "webmaster" and directed to the website's domain should reach the appropriate person.

The most common email address to send to is: "[webmaster@example.com](mailto:webmaster@example.com)"

Note:

The Rocky Linux distribution is a stable and reproducible platform based on the sources of Red Hat Enterprise Linux (RHEL). With this in mind, please understand that:

- \* Neither the Rocky Linux Project nor the Rocky Enterprise Software Foundation have anything to do with this website or its content.
- \* The Rocky Linux Project nor the RFS have "hacked" this webserver: This test page is included with the distribution.

For more information about Rocky Linux, please visit the [Rocky Linux website](#).

I am the admin, what do I do?

You may now add content to the webroot directory for your software.

For systems using the [Apache Webserver](#): You can add content to the directory `/var/www/html/`. Until you do so, people visiting your website will see this page. If you would like this page to not be shown, follow the instructions in: `/etc/httpd/conf.d/welcome.conf`.

For systems using [Nginx](#): You can add your content in a location of your choice and edit the `root` configuration directive in `/etc/nginx/nginx.conf`.
