Scenario	Legitimate vs Phishing Discussion	Phishing or Legitimate
Luke Johnson shares Google Dog	- Looks phishing - Design is right - Email is weird for a friend - Url is http and fake	Phishing
Coca-Cola free blender	- Looks phishing - Source address and address on button is weird	Phishing
paypal invoice	- Source and button look like legitimate addresses - Looks like a fake charge	Phishing
Dropbox is full	- Normal notice and normal link	Legit
SMS Code	- Unrequested and from a regular phone number	Phishing
Someone has your password	- Fake url - Fake email address	Phishing
Your account is under attack	- Fake url - Fake email address	Phishing
Netflix Account	- Fake url - Fake text address	Phishing

Free Phone	- Too good to be true	Phishing
Wait I'm not home	- Valid urls - Normal url	Legit

Which Phishing attack did you find most nefarious?
The paypal one was definitely hardest to notice, because it was a completely legitimate email. The phishing part was the fake charge with the phone number in the message note.
